

Wood Removal Post-Tree Cutting Policy

Approval date: July 13, 2026

Select Board adopted: June 13, 2026

Purpose

This policy establishes a process for residents to follow regarding wood that the Town's Highway Department, Tree Warden and/or utility companies have cut and left on a landowners property.

Process

When trees are cut, either by the Highway Department, Tree Warden or a utility company, landowners will have two weeks to remove, move away from the roadside or give away before the Highway Department, Tree Warden, tree company or another resident can remove at their discretion unless it is creating a public safety hazard.

If residents (non-landowner) are interested in taking the cut wood they should contact the landowner to arrange the wood removal.
